

Drugs on the ACB scale

Aging Brain Care. Anticholinergic Cognitive Burden Scale. 2012 update. Available on the University of East Anglia Website: www.uea.ac.uk/documents/3306616/10940915/Anticholinergics/088bb9e6-3ee2-4b75-b8ce-b2d59dc538c2

ACB score 1 (mild)	ACB score 2 (moderate)	ACB score 3 (severe)
Alimemazine	Amantadine	Amitriptyline
Alprazolam	Belladonna alkaloids	Amoxapine
Alverine	Carbamazepine	Atropine
Atenolol	Cyclobenzprine	Benztropine
Beclometasone dipropionate	Cyproheptadine	Chlorpheniramine
Bupropion	Loxapine	Chlorpromazine
Captopril	Meperidine	Clemastine
Cimetidine	Methotrimeprazine	Clomipramine
Clorazepate	Oxcarbazepine	Clozapine
Codeine	Pethidine	Darifenacin
Colchicine	Pimozide	Desipramine
Dextropropoxyphene		Dicyclomine
Diazepam		Diphenhydramine
Digoxin		Doxepin
Dipyridamole		Flavoxate
Disopyramide phosphate		Hydroxyzine
Fentanyl		Imipramine
Fluvoxamine		Meclozine
Furosemide		Nortriptyline
Haloperidol		Orphenadrine
Hydralazine		Oxybutynin
Hydrocortisone		Paroxetine
Isosorbide		Perphenazine
Loperamide		Procyclidine
Metoprolol		Promazine
Morphine		Promethazine
Nifedipine		Propantheline
Prednisone		Mepyramine
Prednisolone		Solifenacin
Quinine		Scopolamine
Ranitidine		Tolterodine
Theophylline		Trifluoperazine
Timolol		Trihexyphenidyl
Trazodone		Trimipramine
Triamterene		Trospium
Warfarin
